EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the CLAIMS:

This application is in condition for allowance except for the presence of claims 12-22 drawn to an invention non-elected without traverse.

Accordingly, claims 12-22 have been canceled.

The following is an examiner's statement of reasons for allowance: it is deemed novel and unobvious over the prior art of record to so perform a method for encapsulating leadframe-mounted integrated circuits as claimed in claim 1, including removing dust from the pellet holder and from the pellet dispenser; as claimed in claim 7, including removing dust of the plastics material from the leadframe by exposure to a pressure source in communication with a cover of a conveyor; as claimed in claim 9, including conveying leadframe items along a path to a mold located in a molding region while a door (for the mold) is in a second position and retuning the door to the first position; and as claimed in claim 10, including removing dust of the plastics material

from the mold and thereafter, from the brush by applying a vacuum source to the brush at an end position traveled by the brush, as the admitted prior art of record does not teach or suggest said method.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
